INTRODUCING

An elegant breed of catamaran

The Leopard 44 represents Robertson & Caine's innovative developments with modern features not yet seen on production catamarans, while remaining committed to the tried and tested features that have made the Leopard line one of the most sought after brands of catamarans globally.

In line with Leopard Catamarans' reputation for consistently producing award-winning catamarans, the Leopard 44 set out to revolutionize the future design of catamarans, and that it has.

The most significant new feature on the Leopard 44 is the open forward cockpit with direct access from the saloon. Unique to production catamarans, this feature offers increased visibility, ventilation, and a significant new approach to adding increased living space in an ergonomic and safe design feature.

True to the Leopard pedigree, the Leopard 44 is a blue water capable yacht that emphasizes functional open spaces and ease of handling while building on design features that have become standard on the modern cruising catamarans.

CRAFTSMANSHIP

Built for Performance

The Leopard 44 features a raised helm station covered by a hardtop bimini. With direct access from the cockpit and weather deck, and all lines leading aft, the helm station offers a central and secure location for the helmsman.

Both forward and aft cockpits are covered with a continuous hardtop. This creates increased protection from the elements and a stable area for optional solar panels.

The aft cockpit features an open swim platform and versatile seating with ample storage beneath and large table. The exterior of the saloon features large acrylic marine windows aesthetically shaped to add to the sleek profile of the yacht while the front

vertical windscreens maximize ventilation and visibility forward. The forward cockpit boasts additional seating, storage and a stowable table.

INTERIOR

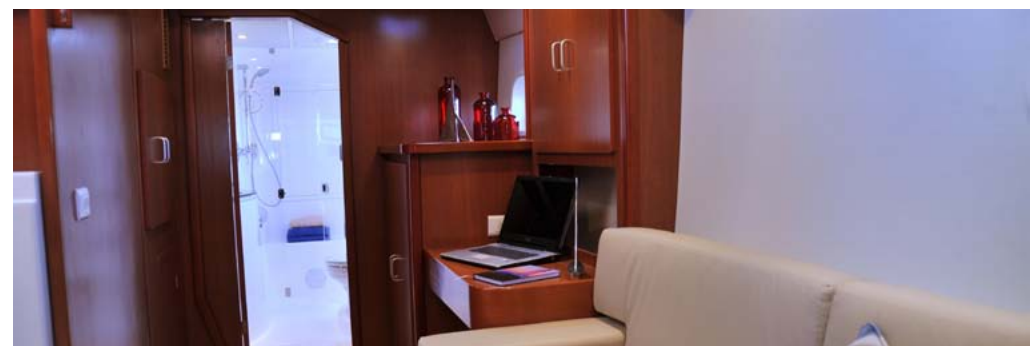

All the amenities needed for your journey

The Leopard 44 is available in 3 or 4 cabin layouts. The 3 cabin layout features two guest cabins in the port hull, each with ensuite head and stall shower. The starboard hull is entirely dedicated to the luxurious owner's suite with a spacious master cabin, lounge area with couch, study area, plenty of storage and private head with large stall shower forward.

Well-ventilated with opening hatch and ports, the Leopard 44 cabins provide a comfortable space to relax, day or night. Adjustable reading lights, fans, full size hanging lockers and shelving add to the practicality and comfort of the Leopard 44. The spacious heads and stall showers are located adjacent to each cabin. Amenities include washbasin with mixer tap, shower with adjustable shower head, corian vanity unit and marine toilet.

Located aft, the master stateroom features a large double berth, book shelf, adjustable reading lights, hanging locker, plentiful shelving for clothing and personal items, as well as additional storage under the bunk. Two opening hatches and two opening ports provide excellent ventilation.

The master suite incorporates a separate study area with dedicated desk, overhead lighting, storage space, and an optional swing seat. The owner's private head, located in the forward part of the hull, features a washbasin with mixer tap, a shower with adjustable shower head, a corian vanity unit and a marine toilet.

COMFORT

Ergonomic, spacious, and innovative design

The Leopard 44 saloon features an L-shaped galley to port with direct serving access to the aft cockpit. The interior settee provides ample seating for up to 8 guests and the dining table can be converted to an optional double berth. Standard appliances include a large stainless steel refrigerator-freezer system to starboard with well-insulated and stylish drawer opening compartments.

The ergonomic galley layout features soft curves and heat-resistant corian countertops. The galley boasts a standard 3 burner stainless steel stove with oven and broiler, double basin sink with mixer tap, ample counter space and easy access cabinet storage.

The saloon showcases large panoramic windows with two forward opening hatches and a forward watertight cockpit door providing excellent ventilation and protection.

INNOVATION

The Leopard Leap

The trend-setting Leopard 44 is the first Leopard model to feature the forward cockpit. This sprightly catamaran is fast, comfortable, practical, and stable. The Leopard 44 excels in all areas. Its blue water sailing capabilities and unique innovative features combine to create a catamaran that defines the Leopard family.
