**CHAIRMAN'S NOTE** 

# LOOKING AHEAD

Mohammed Hussain Alshaali Chairman

Gulf Craft was born in 1982 out of a love for the sea, a passion for building and a firm belief that the success of the UAE should be based around productive industry – three key pillars that still support what the company does three decades since we first began.

32 years is a long time, and as the UAE has undergone a sea change in terms of progress, prosperity and prominence on a global stage, we are privileged to have been both a witness to this transformation and a fellow traveler – growing from a humble UAE-based boat builder to a globally respected shipyard with a presence in more than 40 countries worldwide.

Over the years we have measured our success on the continued confidence and loyalty of our customers and business partners and our ability to maintain a 100% delivery track record – successfully delivering more than 9,000 craft since we first began, across a spectrum that ranges from family fishing boats to the most luxurious superyachts.

The Majesty Yachts brand is in many ways Gulf Craft's flagship brand – representing the epitome of our engineering and design sophistication, our ability to translate our clients' vision into luxurious reality and our ambitions to build bigger and better yachts in the years to come.

**Erwin Bamps**Chief Executive Officer

As a company, Gulf Craft finds itself in a very fortuitous position – both in time and space.

The 30th anniversary year is a good time to acknowledge the company's growth and success over the past three decades but it is also the perfect time to look ahead to what is to come.

Geographically, Gulf Craft is positioned in a very strategic location – close enough to the traditional yacht markets of Europe and poised on the very edge of fast-growing Asia.

With the launch of the Majesty 135, Gulf Craft has proven its capabilities – in terms of innovation and ability to both anticipate and deliver what the global market wants in size and sophistication.

Gulf Craft continues to invest in equipment capable of handling larger and more technically challenging builds and skilled workmanship capable of meeting more demanding requests, proving Gulf Craft's long-term confidence in the global superyacht market and our own position within it.

# **COMPANY HISTORY**

In 1982 Mohammed Hussein Alshaali along with his brothers Abdullah and Jamal, and Dr. Mohammed Hamdan, their long-standing friend, established Gulf Craft in the United Arab Emirates – driven by an entrepreneurial spirit, a love for the sea and a firm belief that the long-term success of the nation lay in the manufacturing industry.

Under Alshaali's guidance, Gulf Craft has grown from being a manufacturer of small pleasure craft in 1982, to a yacht manufacturer in 1991 and a globally respected builder of superyachts since 2000.

Gulf Craft is a major manufacturer of luxury yachts and fiberglass boats and one of the world's top 10 superyacht builders (as listed in the 2014 Global Order Book). Gulf Craft, an award-winning shipyard, has built a distinguished reputation as a manufacturer of a wide diversity of vessels, ranging from fishing and family boats of 27 feet to sport cruises and semi-customized luxury superyachts of up to 155 feet.

With an annual production capacity of around 400 craft and expertise built over three decades in the business, Gulf Craft has a presence in all boating markets globally through its Majesty Yachts, Oryx and Silvercraft brands. In addition, Gulf Craft provides worldwide maintenance and re-fit services as well as advisory on all aspects of boat ownership.

Gulf Craft is recognized in the marine manufacturing industry for its reliability, innovative design layouts, contemporary and elegant exterior styling – favored in both regional and international markets. An extensive network of international dealers represents the company in diversified markets – from Europe to Australia. Exhibiting at leading international boat shows keeps Gulf Craft's brands and superior product range at the forefront of market attention.

1982

With a modest 218,000 square foot facility in Ajman, UAE, Gulf Craft starts producing 14 foot runabouts for the local market.

1997

Launch of the Majesty 86.

2003

Building on the success of milestone projects like the Majesty 86 and Millenium 118, Gulf Craft launched the brand and product range Majesty Yachts in an ambitious drive to develop the region's first full line-up of luxury yachts.

2008

Born from the 27 years boat building experience, the Silvercraft range is established to represent Gulf Craft's wide and diverse range of smaller family and fishing boats.

# 2012

Gulf Craft launches its largest superyacht ever built – the Majesty 135 – further solidifying the company's position as a major player in the prestigious global superyacht market.

1992

The Adora 53, the first complex yacht to be built by Gulf Craft is launched. This craft would remain one of the most desirable and popular yacht models in the Middle East for years to come.

2000

A new 100,000 square foot facility producing top-quality yachts, pleasure boats, and rapid transport vessels is launched in the Maldives.

2001

Gulf Craft's largest manufacturing facility opens in Umm Al Ouwain in the Middle East, complete with 150 ton travel lift and launching bay. Launch of the Millenium 118, Gulf Craft's first superyacht over 30m.

2006

Gulf Craft introduces the Oryx product line to fill an existing gap between large yachts and small pleasure craft. Specializing in sport yachts and open cruisers, it gains recognition among a younger target market.

2011

 Gulf Craft launches the Gulf 95 Exp at the Dubai International Boat Show – presenting a new approach to explorer yacht design that maximizes onboard living space and comfort. 2014

Gulf Craft has clinched a top 10 ranking among the world's superyacht-building shipyards, according to the Boat International Global Order book report, moving up to the 10th position from its previous ranking of 17th,

Majesty 105 was announced in the finalist of The World Superyacht Awards 2014. This prestigious award makes the Majesty 105 in a favored position already because of its unique overall design and sophisticated engineering process.

Gulf Craft received an award for "Shipyard of the Year 2014" at the Cannes Yachting Festival, further .cementing its global success

# REFINED BOAT BUILDING SKILLS

# PERFECTED OVER 30 YEARS

At Gulf Craft we believe each yacht we build is unique – an individual and complex exercise in engineering, design and craftsmanship; which is why we prefer the term yacht builders rather than yacht producers. Our shipyard does not resemble a production line – each yacht is an individual project, finished uniquely to match the desires of its owner.

Our yachts are developed using detailed computer modeling and using the latest technologies such as CNC and waterjet, but the human hand still lends the final touches and it is the human eye that grants the final seal of approval after the industrial tests and standards are stamped. We value craftsmanship and it is a skill we have nurtured for over three decades.

Today Gulf Craft employs more than 2,000 employees across its shipyards and manufacturing facilities in Ajman, Umm Al Ouwain and Sharjah in the UAE and the Maldives. Globally, Gulf Craft ranks 10th on the 2013 Global order book of superyacht shipyards.

Gulf Craft produces yachts to strict international maritime and industrial standards, such as ABS, RINA and MCA. Its shipyard is RINA and Bureau Veritas certified. Our manufacturing facilities have an annual production capacity of around 400 craft, and possess launching bay and travel lift capabilities to build superyachts up to 50 m.

Our employees are experts in their field – from the naval engineers who determine how well our yachts perform in the high seas to the carpenters who minutely match the grain of the glossy veneer used in onboard cabinetry.

We invest in training our staff and upgrading their skills continuously, so that our employees build a long career within the company and the company benefits by retaining their expertise. And consequently every yacht we build is a better version of the one before.

# **AFTER-SALES SERVICE**

Owning a boat or yacht is a long-term commitment. Which is why it's important to always make sure it is in the best of hands, especially when it needs servicing or refurbishment. Reputation and experience are usually the first things that come to mind when your boat needs work and that's where Gulf Craft makes a difference.

At Gulf Craft, our after-sales centers follow the same standards and commitment to international quality that our manufacturing facilities adhere to. We draw on our 32 years of experience in boat building, engineering and refit to understand the after-sales needs of our customers and take care of them so that your craft retains its aesthetic, performance and resale value.

### **GULF CRAFT PRODUCT RANGE**

YACHT RANGE **56 - 88** 

Gulf Craft launched its range of luxury fly-bridge yachts under the name of Majesty Yachts in 2004, and today features an innovative and extensive yachts range from 56 feet to 88 feet, in addition to the superyachts range.

Majesty Yachts relies on a in-house design team, as well as on Dutch, Italian, British and Australian designers, catering to diverse global tastes in exterior styling and interior design. The Majesty Yachts team combines technical know-how, practical experience, and decades of steady investment to deliver personalized luxury without the price premium.

**CLOCKWISE** Majesty 88. Majesty 70. Majesty 56.

**ABOVE Silvercraft 36 HT** 

Year after year, we're striving to exceed our customers' expectations. That's why we created the new Silvercraft sport fishing and family boats. Continuing the Gulf Craft reputation for constant innovation and superior standard of quality, the Silvercraft range combines advanced hull designs, superior performance and evolving styles.

With the company founders being seasoned seafarers themselves, every new boat type is carefully designed and rigorously tested before introduction to the market. The strive for application of the latest technologies and to meet the design requirements of our customers spread all over the globe, is forcing a constant rejuvenation and rethinking of the production process, our products and services, manifesting itself in our ever-improving product quality, trying to redefine powerboating every single day.

**ABOVE Oryx 42** 

In 2006 Gulf Craft introduced the Oryx sport cruiser – the sea-borne equivalent of an elite sports car – that became an instant hit within weeks of its launch. Now the Oryx has evolved into a range of high-performance sport yachts and cruisers of different sizes that are exported worldwide.

Always innovative, the Oryx range continues to offer outstanding value-for-money and uncompromising on water performance for the growing sports cruiser market.

Pictures in this catalogue may be taken from different vessels of the same type for example purpose only. Performance estimates are given in good faith, but are in no way guaranteed. Dirt on the hull, damage to the propellers, external water and air temperatures and added weight, fuel and water carried can all adversely affect performance. For these and other reasons we can give no performance guarantees. Data and characteristics are not binding: details, colors, descriptions and illustrations are for information purpose only. The drawings and pictures may include specific equipment or modifications which are not part of the standard specifications of the vessel. Standard specifications may be defined differently in different sales territories. Gulf Craft Inc. reserves the right to make any changes in specifications or equipment without prior notice. In case on any inconsistencies between specification sheet, product catalogue and price list, the price list prevails. Customers are recommended to contact one of our sales representatives to reconfirm standard and optional features on the vessels.
