

A white Sunseeker Manhattan 73 yacht is shown from a side profile, floating on a deep blue sea. The yacht features a large black canvas cover over the cockpit area, multiple antennas, and a Spanish flag at the stern. The background includes a rocky coastline with greenery on the left and a small rock in the distance under a clear sky.

Sunseeker Manhattan 73

EUR 2.175.000,

Year built 2013

REMARKS

Nachtwind is undoubtedly the most beautiful Sunseeker Manhattan 73 on the market in 2017. With the noble James Bond lacquer in Silbergrau and details in honeycomb black it is an absolute eye-catcher and out-shines many even twice as big yachts in the harbor.

The design with the flowing lines comes from the probably best shipyard in England: Sunseeker International.

The hull is characterized by a low V and is synonymous with the best driving behavior even in rough waters, as it simply cuts through the waves. Thanks to the hydraulic fin stabilization system, the yacht sits absolutely stable in the turquoise anchor bay in spite of the deep V.

The owner saves no effort to keep the yacht in a faultless condition. Every year, all service is done and all systems are maintained.

Some highlights of the many extras, which the experienced owner installed:

- Large fresh water maker

- Hydraulic crane on the flybridge for jet skiing

- Silver metallic paint finish

- Large submersible compressor

- Image Sonar

- Second independent depth gauge

- AIS transmitter and receiver

- Camera system

- Yachtcontroller

- various stainless steel special products for fenders, additional handrails for bath stairs, brackets, etc.

- Electric opening of the bimini

- Reinforcement of the anchor wind

Contact us now to arrange a visit. You will not find a nicer boat. Guaranteed.
